Nikhil Saxena

nikhil.saxena@example.com | +91 98765 43212 | 7 years experience

Target Role	Senior Software Engineer / Backend Systems
Work Authorization	Eligible for remote and hybrid opportunities
Preferred Domain	SaaS platforms, cloud infrastructure, developer tools

Skills

- Java, Spring Boot, Spring
- MySQL, PostgreSQL, Oracle
- Docker, Jenkins, CI/CD, AWS
- Agile, Team Leadership

Experience

- Backend Tech Lead at Enterprise Corp (2022-Present)
- Java Developer at Systems Ltd (2017-2022)

Certifications

- Oracle Java Professional
- FastAPI Foundations Certificate

Selected Achievements

- Migrated legacy REST endpoints into observable services.
- Built Python-based operational tools for release validation.
- Improved post-incident response workflow through runbook automation.
- Contributed to gradual Java-to-Python service adoption plan.

Project Highlights

- Delivered measurable engineering outcomes in project iteration 1, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 2, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 3, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 4, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 5, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 6, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 7, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 8, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 9, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 10, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 11, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 12, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 13, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 14, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 15, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 16, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 17, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 18, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 19, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 20, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 21, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 22, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 23, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 24, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 25, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 26, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 27, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 28, including reliability improvements, code quality standards, and better release readiness.
