Riya Verma

riya.verma@example.com | +91 98765 43211 | 3 years experience

Target Role	Senior Software Engineer / Backend Systems
Work Authorization	Eligible for remote and hybrid opportunities
Preferred Domain	SaaS platforms, cloud infrastructure, developer tools

Skills

- Python, Django, Flask, FastAPI
- GCP, Docker, Kubernetes, CI/CD
- SQL, PostgreSQL, MongoDB
- REST APIs, Git

Experience

- Software Engineer at Tech Solutions (2023-Present)
- Junior Developer at StartUp Hub (2021-2023)

Certifications

- Google Cloud Associate Cloud Engineer

Selected Achievements

- Shipped versioned API gateway strategy for partner integrations.
- Improved API onboarding docs and reduced support tickets by 28%.
- Designed retry and circuit-breaker flow for external API failures.

Project Highlights

- Delivered measurable engineering outcomes in project iteration 1, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 2, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 3, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 4, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 5, including reliability improvements, code quality standards, and better release readiness.
- Delivered measurable engineering outcomes in project iteration 6, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 7, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 8, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 9, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 10, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 11, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 12, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 13, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 14, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 15, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 16, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 17, including reliability improvements, code quality standards, and better release readiness.

- Delivered measurable engineering outcomes in project iteration 18, including reliability improvements, code quality standards, and better release readiness.
